**SecurityCEU.com Launches *Alarm Science* Online Training Course
in Partnership with Nationally Recognized Forensic Alarm and Security Expert
Jeffrey D. Zwirn**

SecurityCEU.com has launched *Alarm Science Course 1*, a new online training course based on the authoritative peer-reviewed treatise *The Alarm Science Manual™*, by nationally known alarm and security industry expert Jeffrey D. Zwirn, CPP, CFPS, CFE, SET, FASI&T, CHPA-IV, MBAT.

The *Alarm Science Course 1* offers an in-depth and fascinating forensic look at security systems that will help to scientifically and technically ensure that electronic security and life safety systems will operate as intended, and most importantly when needed in an emergency. The material in the course is viewed from a security, life safety, and legal perspective.

The *Alarm Science Manual* is the first of its kind authoritative treatise that is part of the New York City Police Departments training curriculum, which includes Local, State, and Federal Law Enforcement Agencies such as Special Agents From the FBI, Joint Terrorism Task Force, Counter-Terrorism Bureau, Deputies from The US Marshals Office, Department of Homeland Security and the NYPD Major Case Squad.

The *Alarm Science Manual* has been peer-reviewed and praised by nationally recognized experts from the Alarm System, Central Station, Legal Communities, and by University Professors including but not limited to NTS/ESA Instructor, Dale Eller, NTS/ESA Instructor Don McInnes, Peter Lowitt, President of Lowitt Alarms, Ralph Sevinor, President of Wayne Alarm Systems, Lessing Gold, Attorney at Law, Partner, Mitchell, Silberburg & Knupp, Michael Revness, Attorney at Law, Kurtz and Revness, Dr. Robert McCrie, Ph.D., CPP, Professor of Security Management and Deputy Chair Department of Security, Fire, and Emergency Management, John Jay College of Criminal Justice, City University of New York (CUNY) and Dr. Daniel Kennedy, Ph.D. CPP, Consulting Forensic Criminologist and Professor Emeritus, Criminal Justice and Security Administration, University of Detroit Mercy.

“SecurityCEU.com is about staying relevant and providing our clients the best training possible from which the security and alarm industry can truly benefit.”, said Connie Moorhead, CEO at The CMOOR Group who owns and operates SecurityCEU.com. “We are so thrilled to be offering this course in partnership with Jeffrey Zwirn, who is known throughout the industry as THE expert on the forensic study of alarm systems.”

The target audience for the training is multifaceted. Alarm contractors, installers, technicians, security managers, directors, project managers, product development teams, risk managers, sales professionals, authorities having jurisdiction, fire protection engineers, electrical engineers, subject matter experts, systems consultants, and legal professionals. With regards to Central Stations, this course is also critical to central-station

management, supervisors, and operators in that it will benefit them by applying *Alarm Science Course 1* in their business operations.

The *Alarm Science Course 1* is presented in partnership with Zwirn, President of IDS Research and Development, Incorporated. Zwirn is recognized by the alarm and security industry as the preeminent forensic alarm expert. Zwirn has over 40 years of specialized expertise in the alarm and security industry, having been involved in the security survey, need analysis, system recommendations, sales, design, installation, programming, testing, inspection, service, maintenance, and monitoring of more than five thousand security and life safety systems for residential, commercial, industrial, and governmental applications.

“Online learning is an ideal means of teaching this mission-critical information that will truly help all players in the security industry. The same principles and best practices that may help protect subscribers from serious personal injury, loss of life, and increased property damage may also help minimize legal liability for security companies,” said Zwirn. “This is a first of its kind training course, and I can’t think of a better partner than SecurityCEU.com to take my book and transform it to an e-learning training course.”

Alarm Science Course 1 is approximately three hours in length and will be sold separately from the SecurityCEU library. The individual rate is \$79/student/year. SecurityCEU.com is also offering a corporate rate starting at \$59/student/year and will be discounted based on volume. The corporate rate starts with as few as five students.

For details on the *Alarm Science, Course 1* online training program, visit <https://www.securityceu.com/shop/product.php?productid=16588&cat=381&page=1&>.

About SecurityCEU.com

For over 20 years, SecurityCEU.com (www.SecurityCEU.com) has provided continuing education and licensing compliance solutions to the security, fire, and life safety industry. The site offers over 190 hours of online training, all approved for CEUs at the national and state level for license compliance. In addition, SecurityCEU.com is the home of the award-winning Obsequio compliance management system, which tracks, reports on, and automates the licensing and certification renewal processes.
